Open to: Engineering leadership roles across India, Singapore, and Dubai/UAE

Professional Summary

Senior Engineering Leader / Director of Engineering with 16+ years of experience leading fintech, SaaS, and platform engineering organizations across distributed India-US teams. Manager of managers with ownership of payment platforms processing 5–15K TPS and \$60–90M daily transaction volume, leading 20+ engineers directly and influencing 30+ across cross-functional payment domains. Known for modernizing monoliths into cloud-native Go/Java microservices, improving reliability and observability, reducing platform cost, and translating business, regulatory, and product priorities into execution roadmaps. Recent focus includes AI-assisted SDLC, SRE maturity, FinOps, platform modernization, and GCC/site scaling.

Leadership & Technical Strengths

Leadership: Organization design, talent hiring, coaching & mentoring, cost optimization, OKR planning, roadmap execution, stakeholder management, SRE and Incident Management, AI-Assisted SDLC

Domain: Payments, fintech platforms, recurring/card payments, compliance-heavy systems, SaaS platforms, GCC scaling, Cloud Native Platforms

Architecture: Distributed systems, Microservices, Event-driven platforms, CQRS, Transactional Outbox, Circuit Breaker, Observability, Platform modernization (Strangler Fig Pattern)

Languages & Frameworks: Java, Go, PHP, Python, Shell Scripting, Spring Boot, Symfony/API Platform, Echo (Go), gRPC

Cloud & DevOps: AWS, Azure AKS, Kubernetes, Docker, Terraform, Ansible, Jenkins, GitHub Actions, Azure DevOps, Argo CD

Data & Messaging: MySQL, Postgres, TiDB, MongoDB, Cassandra, Redis, Kafka, RabbitMQ, Amazon SQS, Apache Pinot, Elasticsearch, Databricks

Observability & FinOps: CloudZero, Datadog, ELK Stack, OpenTelemetry, Grafana, Prometheus, PagerDuty, Micrometer, Zipkin

AI-Assisted Engineering: Claude Code, Cursor IDE, ChatGPT, NotebookLM, n8n.io workflows, AI-assisted code review, refactoring, documentation and test generation

Professional Experience

Senior Engineering Manager, Razorpay (Bengaluru, Karnataka, India) | Mar 2025 - Apr 2026

- Partnered with Product, Business, Risk, Operations and Compliance teams to define and execute roadmap for two payment platforms processing \$60-90M daily volume and up to 15K TPS.
- Led 21 engineers across 3 pods and influenced 33 engineers across the broader payments organization, including routing, terminal, and cross-border payment domains.
- Drove re-architecture of legacy PHP API monolith into scalable Go microservices for card and recurring payment systems aligned with the SaCRED (Security, Compliance, Reliability, Efficiency, Delivery) framework.
- Identified a business visibility gap where merchant-impacting payment issues were detected with 20-minute delays. Defined and delivered a real-time observability platform using Kafka, Spark Streaming and Apache Pinot, reducing detection latency to under 1 second across 40+ high-value merchants.
- Delivered Cred Pay and Apple Pay integrations as primary OKRs for FY26, impacting merchant adoption and payment success rates.
- Owned org-wide technical debt and FinOps roadmap to reduce average logging cost from ₹0.09 to ₹0.03 per transaction.
- Established engineering standards for incident management, on-call readiness, CI/CD maturity, and

production reliability.

- Established AI-assisted SDLC workflows using Claude Code, Cursor, ChatGPT and NotebookLM for documentation, code review, refactoring, and test generation while improving developer productivity and review quality.

Director, Software Engineering, Guidepoint Global (Pune, Maharashtra, India) | Jun 2023 - Feb 2025

- Led engineering teams responsible for CRM modernization, advisor discovery, client portals, and AI-assisted experiences while partnering directly with product and business stakeholders in New York.
- Delivered end-to-end PHP 8 migration of the entire ecosystem within 2 months, enabling SOC2 compliance and continuity for enterprise clients including BCG and McKinsey.
- Led decomposition of PHP monolithic systems into microservices and integrated Databricks ETL pipelines for advisor discovery platforms.
- Designed and delivered federated micro-frontend architecture unifying Advisor Search, Insights 2.0, and AI Co-pilot; integrated LLM-based features for advisor matching and insights generation.
- Owned organization design, execution planning, and stakeholder management with the CTO to transform the Pune office into a Global Capacity Center (GCC).

Manager, Engineering, Acquia (Pune, Maharashtra, India) | Feb 2021 - Jun 2023

- Built and led a high-performing engineering team for NGC Upgrades and Data platforms across IST and EST (Boston) time zones, covering Junior to Principal engineers across full-time and contractor roles.
- Delivered \$660K annual COGS savings by migrating customers from Acquia Cloud Classic to Cloud Next, along with provisioning of the multi-tenant database model Amazon Aurora MySQL.
- Owned delivery of ACN (Acquia Cloud Next) roadmap features accelerating enterprise customer onboarding and adoption.
- Championed DevOps, Kubernetes, Terraform, CI/CD automation, and SRE (Site Reliability Engineering) improvements across ACN and DAM (Digital Asset Management) platforms.

Java Technical Lead to Engineering Manager, MobiKwik (Gurgaon, Haryana, India) | Nov 2016 - Feb 2021

- Partnered with business leaders to identify market opportunities and launch Insurance, Lending and Travel businesses from inception to production, defining MVP scope, partner integrations, technical architecture and execution strategy.
- Engineered MobiKwik's insurance cross-sell framework (Stargate), enabling multiple service bundles to be sold in a single transaction.
- Built teams from 0→12 engineers for travel and financial services domains; hired 40+ engineers across experience levels since 2016.
- Led transformation from wallet-only to wallet-as-payment-gateway architecture aligned with RBI PPI regulations.
- Defined and owned SLAs of 99.90% availability for recharge and bill payments with a fault-tolerant architecture implementing the circuit-breaker pattern.
- Achieved API latency targets under 200ms for recharge payments across wallet and gateway modes like Euronet, BillDesk, and BillAvenue as official BBPOUs.
- Built centralized log aggregation, distributed correlation and tracing on an ELK-based observability stack from scratch, improving incident RCA and system reliability.
- Led tech-debt reduction initiative increasing recharge GMV from ₹181 to ₹210 crores/month by solving top pain points that resulted in direct impact.

Staff Software Engineer, ShopClues (Gurgaon, Haryana, India) | Sep 2015 - Nov 2016

- Led a team of 6 engineers owning catalogue ingestion, moderation, and inventory systems.
- Increased bulk product ingestion throughput from 30K to 100K products per day.
- Built REST-based catalogue and inventory services using PHP Phalcon, also created the plan for sharding and replication of the products DB.
- Reduced filtering banned-product enforcement SLA from 5 days to under 24 hours.

Senior Software Engineer to Lead Engineer, InfoEdge (Naukri.com) (Noida, Uttar Pradesh, India)
| Nov 2011 - May 2015

- Migrated legacy systems from Symfony 1.x to Symfony 2.x.
- Built Naukri.com's Background Check and Priority Applicant platforms from scratch.
- Optimized CRM email/SMS pipelines, reducing daily SLA from 3 PM to 11 AM for over 1M active users.
- Introduced Git, Docker, and Agile practices across engineering teams.

Software Engineer, Comviva Technologies (Gurgaon, Haryana, India) | Dec 2009 - Mar 2011

- Dedicated module developer for PreTUPS (TM) 4.5/4.6, a prepaid top-up system deployed across 50+ global telecom clients.
- Selected via campus placement and ranked as the top candidate choice for the dev teams of critical Mobile Business Solutions.
- SPOC for Vodafone East, West, and North regions handling various mission-critical client migrations, upgrades, and setup on-site.

Education

Bachelor of Technology, Computer Engineering

Jamia Millia Islamia, New Delhi (NIRF India Top 25 Engineering Institute List) | Jul 2005 - Jun 2009

Last Updated: July 2026 – Pune, Maharashtra, India
